

Hello,

I am a resident of : .....

I am strongly opposed to any microwave towers being erected in our valley and ask you to allow more time for public scrutiny and opinion ie. I am Requesting an Extension to this DA please.

I also request an extension of the DA so that I may have the opportunity to address council on this matter.

This is a hugely important issue and one that myself and many other residents are passionate about.

2 weeks is not anywhere near an adequate length of time for proper assessment of this proposal. The 5G towers have not been assessed for public (human or fauna - total ecosystem) safety. This is a huge concern.

I would like to bring some points to your attention and request your urgent response please so that it may be taken to the community public meeting scheduled for this Wednesday evening and included in the discussion of all aspects of this proposal:-

- **The proposed tower appears to conflict with the Purpose and Performance Outcomes of the Scenic Amenity Overlay Code.**
- **The proposed tower appears to conflict with the Purpose and Performance Outcomes of the Telecommunications Facilities Code.**
- **Aside from the extensive scientific data that outlines the detrimental health issues as a result of such emissions the proposed tower also appears to be located within an area of significant environmental value and may thus have detrimental effects upon protected plants and wildlife**
- **According to written legal advice from the EDO, a telecommunications tower such as the one proposed is not a permissible development within the applicable zoning. A copy of said advice is available for your perusal upon request.**
- **According to published real estate reports, the proposed tower would significantly lessen the value and salability of surrounding properties, and in effect constitute a financial loss to the owners of said properties without fair and just compensation.**

**- A significant body of peer-reviewed science demonstrates adverse biological effects from microwave exposure at levels comparable to what residents living within 500 metres of the proposed tower will be subjected to. Copies of this information are available for your perusal upon request.**

Thank you for your attention to this matter. I look forward to hearing back from you.

Kind regards
